

SAHIL SHAIKH

AIML Engineer(Student | Third-Year CSE – AIML)

+91-9518755570	sahil.shaikh24@aiml.sce.edu.in	[LinkedIn Profile]	[Portfolio Link]
GitHub	 Nerul, Navi Mumbai	[LeetCode]	[Medium]

PROFESSIONAL SUMMARY

Third-year Computer Science (AIML) student with strong hands-on experience in designing, training, evaluating, and deploying machine learning and deep learning models across NLP, computer vision, and tabular domains. Proven ability to take ML systems from data preprocessing to production-ready APIs, with measurable performance improvements and rigorous evaluation. Strong fundamentals in ML theory, model optimization, and real-world deployment, backed by top academic performance and industry-recognized certifications.

TECHNICAL SKILLS

- **Programming:** Python (primary), SQL, Java, C
- **Machine Learning:** Supervised & Unsupervised Learning, Feature Engineering, Model Hyperparameter Tuning and Ensemble Methods
- **Deep Learning:** Neural Networks, CNNs, Transfer Learning, Fine-Tuning
- **Frameworks & Libraries:** PyTorch, TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas
- **NLP:** Text Classification, Sentiment Analysis, Tokenization, Transformer-based Models
- **Deployment & Tools:** Flask, REST APIs, GitHub, Google Colab, Jupyter Notebook

PROJECTS

AdvancedNeuroNutrigenomics-AI | Deep Learning, Healthcare ML - [\[GitHub\]](#)

- Built a multi-class deep learning classifier to predict depression, anxiety, and bipolar disorder categories using genomic and clinical datasets.
- Applied feature selection and hyperparameter tuning to improve generalization, achieving >90% F1 score across classes.
- Demonstrated potential for personalized mental-health risk assessment through data-driven modeling.

Dog Breed Identification System | CNNs, Transfer Learning - [\[Github\]](#)

- Trained and fine-tuned a MobileNetV2-based CNN on a 120-class dog breed dataset, achieving 94% classification accuracy.
- Reduced overfitting by 18% using data augmentation and transfer learning strategies.
- Deployed the trained model for real-time inference using a lightweight serving pipeline.

Fake Review Detection Model | NLP, Machine Learning - [\[Github\]](#)

- Developed a supervised NLP pipeline to classify deceptive vs genuine product reviews using text preprocessing and feature engineering.
- Evaluated multiple classifiers and optimized model performance through cross-validation and hyperparameter tuning.
- Achieved high precision and recall on held-out test data, demonstrating robustness against noisy user-generated text.

Breast Cancer Detection Model | Classification, Medical ML - [\[Github\]](#)

- Implemented a machine learning classification system to detect malignant vs benign tumors from structured medical data.
- Performed exploratory data analysis, feature scaling, and model comparison to select the optimal algorithm.
- Achieved strong predictive performance while prioritizing recall to reduce false negatives.

Heart Disease Prediction System | ML Pipelines, Evaluation - [\[Github\]](#)

- Built an end-to-end ML pipeline for heart disease risk prediction using tabular clinical data.
- Compared multiple models and optimized hyperparameters to improve predictive accuracy and stability.
- Validated model performance using standard evaluation metrics and test-train splits.

EXPERIENCE

Machine Learning Intern — Orinson Technology Pvt. Ltd.

Dec 2024 – Jan 2025 | Remote

- Built and deployed regression and classification models, improving baseline accuracy by 15% through feature engineering and preprocessing.
- Optimized training workflows using GridSearchCV and early stopping, reducing model training time by 20%.
- Developed scalable ML pipelines using PyTorch, TensorFlow, and Scikit-learn.
- Deployed trained models as Flask-based REST APIs for real-world inference.

Agentic AI Training Program (Learner → Builder) — IBM SkillsBuild

Jul 2025 – Aug 2025 | Virtual

- Completed hands-on training in ML pipelines, model packaging, and reproducibility.
- Designed a complete data-to-deployment workflow covering preprocessing, tuning, and evaluation.
- Delivered a capstone project demonstrating reproducible ML experimentation practices.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science Engineering (AIML)

Saraswati College of Engineering, University of Mumbai | 2023 – 2027 (Expected)

- **CGPA:** 9.64 / 10 (Top 1%)
- Ranked **1st in Academics** during 1st year (Average SGPA: 9.74)
- Relevant Coursework: Machine Learning, Deep Learning, NLP, Computer Vision, Data Structures & Algorithms

CERTIFICATIONS

- Oracle Certified Professional - DS & Machine Learning (OCI)
- Oracle Certified - Generative AI & AI Foundations
- Complete AI/ML & Data Science Bootcamp – Zero To Mastery Academy
- Deep Learning & Neural Networks – Udemy
